INTRODUCTION

There are countries you travel through. And there are countries you really experience. Norway is definitely in the second category. In Norway, roads do more than connect places—they open up new horizons. Where the asphalt seems to unroll effortlessly beside fjords, along rugged coastlines, and across wide plateaus, always conjuring a feeling of boundless freedom.

Norway is the land of RVs and cruise ships, of vast distances interspersed with tranquil moments. A country with perfectly smooth roads that snake through landscapes of stunning clarity as if drawn there. Waterfalls tumble directly at the roadside, fjords carve deeply into the rocks, and around every corner is a new panorama that widens the eyes and broadens the mind. Nature here feels untouched, almost ancient—and yet the environment has been masterfully developed, with roads that impressively

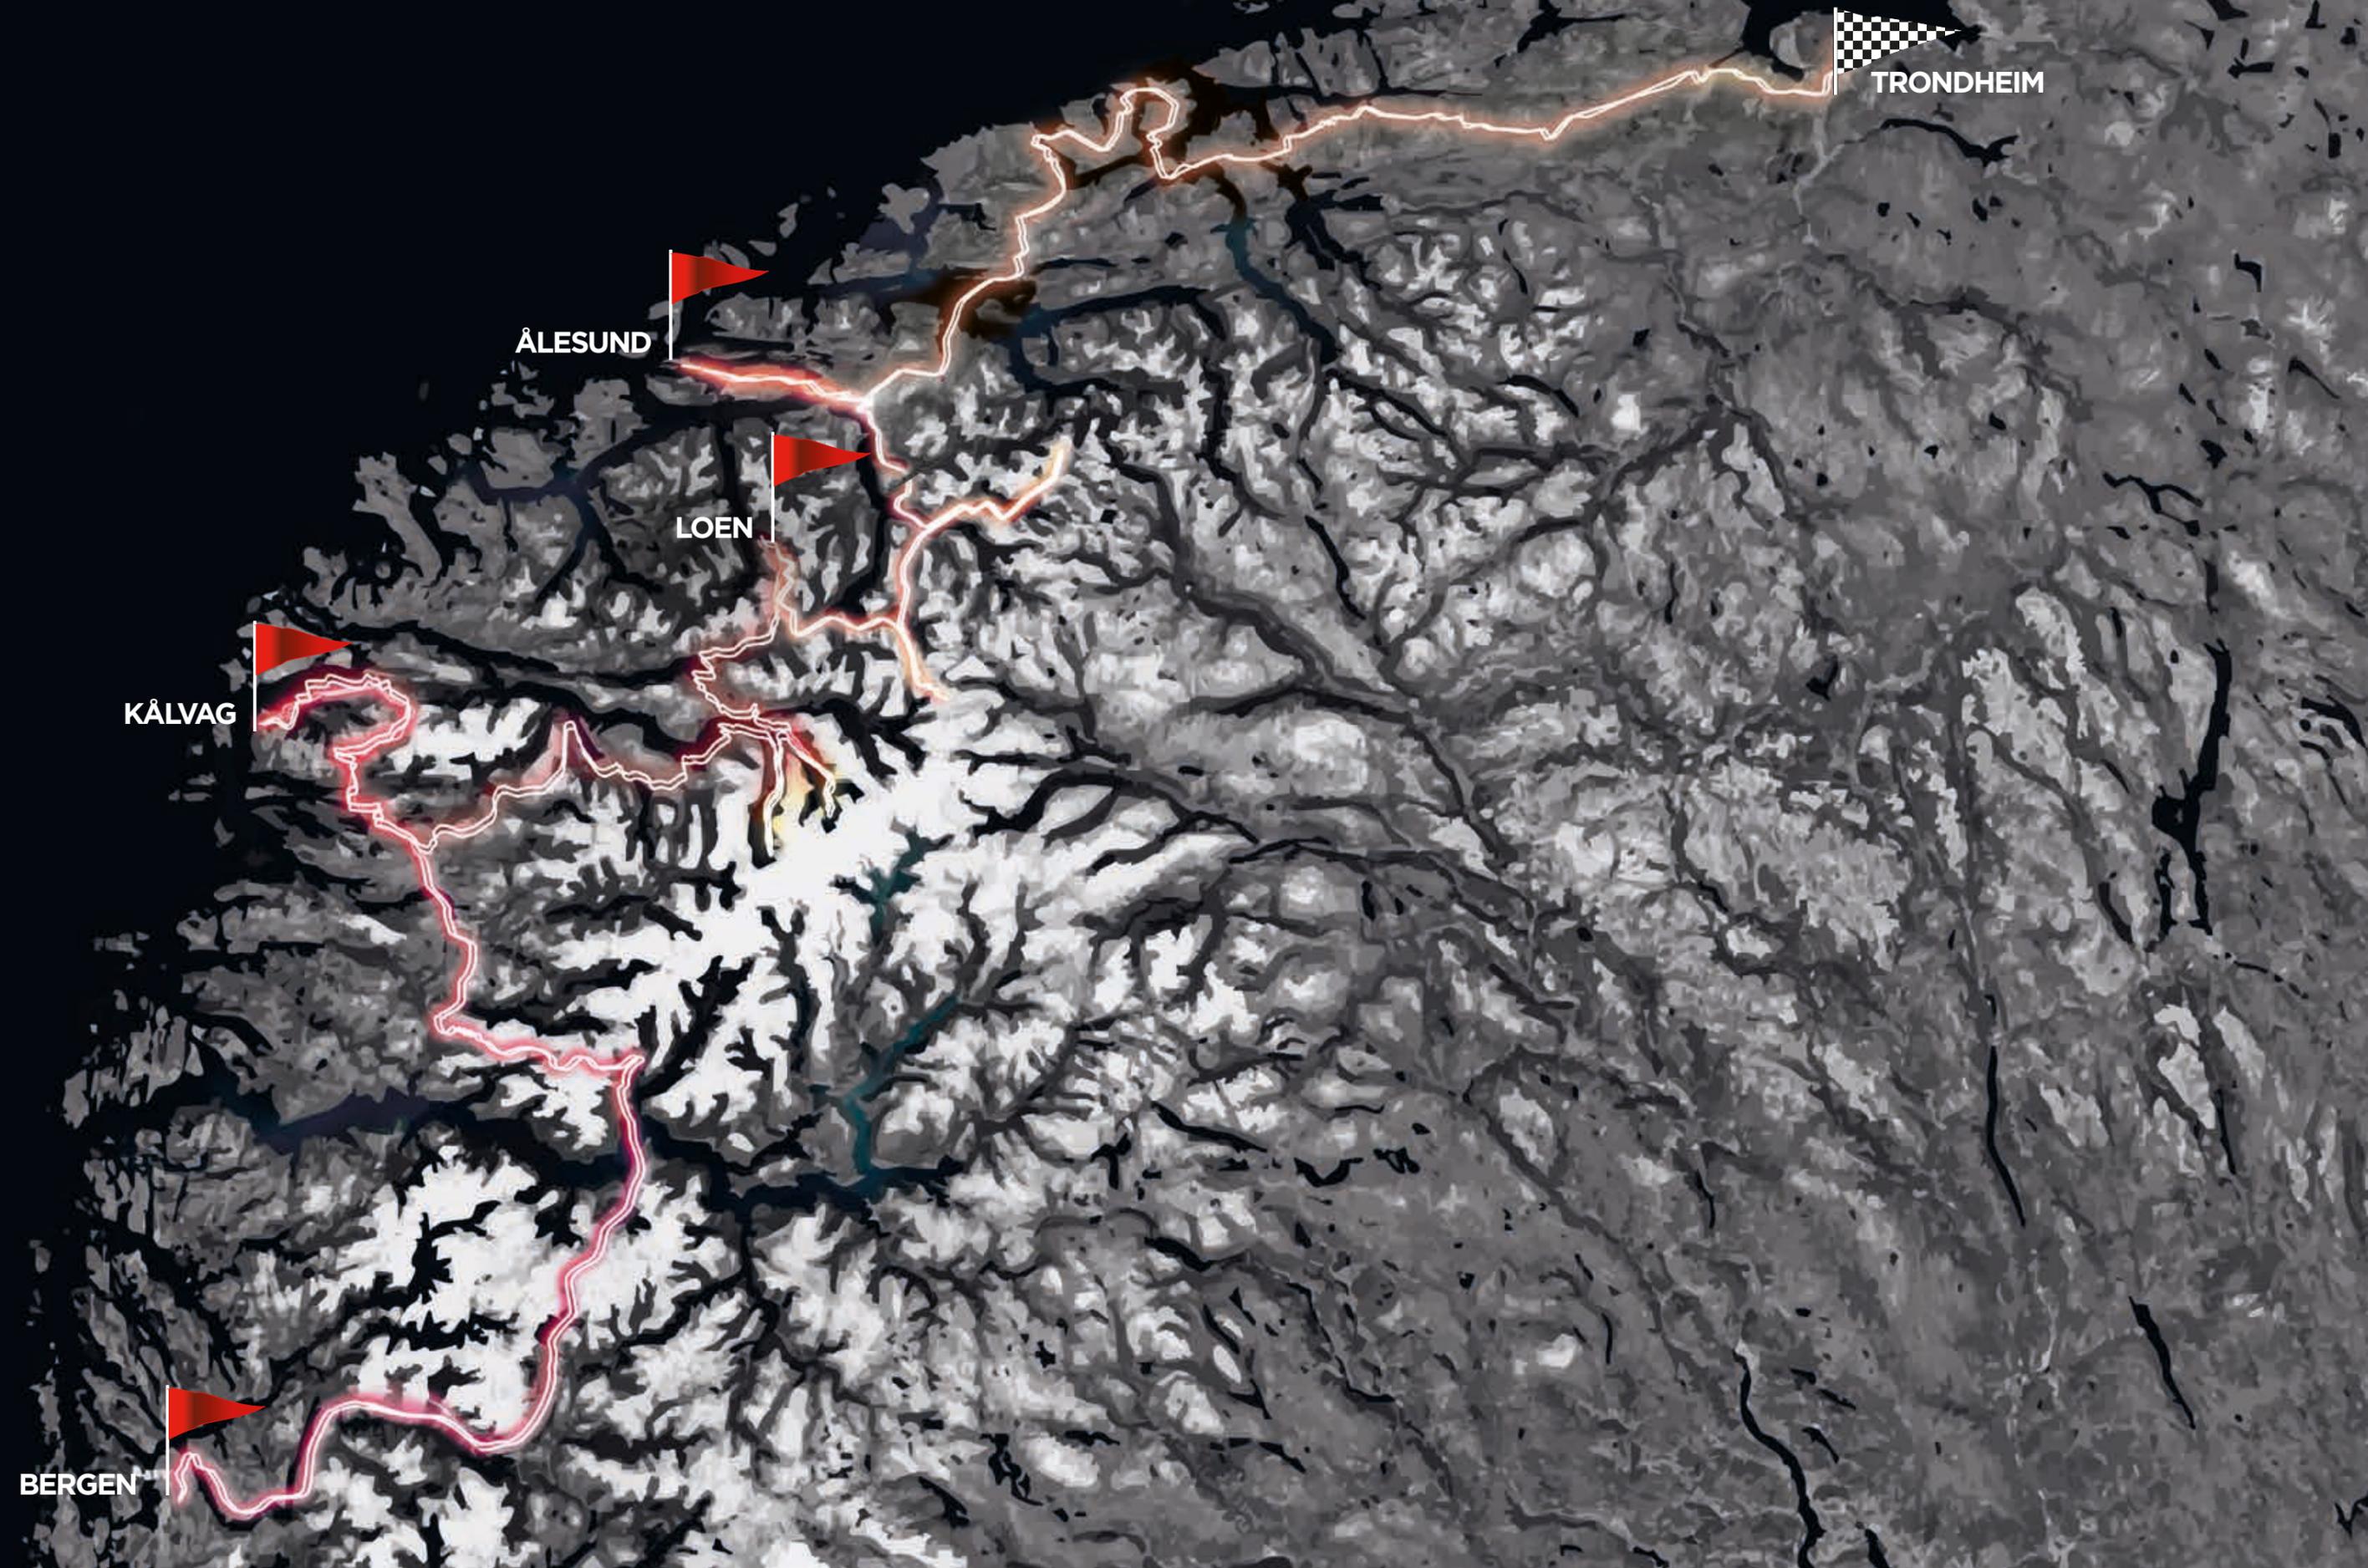

combine engineering with a real feel for the landscape.

Norway's vastness is tangible. Sparsely populated, open, and tranquil; friendly people, charming towns, and little villages that blend sensitively into the landscape. In summer the nights seem endless and the light is soft and constantly present, while in winter the Northern Lights bring the sky to life. It is a land of extremes, but is never loud about it.

At the same time, Norway is a paradise for any outdoor fans. Hiking, kayaking, exploring mountains, coasts, and waterways are as natural a part of life as driving is. The country's scenic roads are spectacular routes, but so much more: They are experiences in which motion and landscape blend into one. Roads such as the Trollstigen or the Atlantic Road are already legends, not because of their length or speed, but because they have an ability to stir authentic emotions.

This book is a tribute to precisely those synergies. To a country where freedom is not a stage show, but lived and breathed reality. To roads that mix driving for pleasure with awe and wonder. To the feeling of being on the road, no rush, eyes wide open, mind alert. Norway is an invitation not simply to pass through, but to plunge straight in. Every route tells a story of vastness and precision, of natural forces and human creativity.

Here, "limitless" is more than a promise—it's a state of mind. Embrace these roads and explore Norway not only through the windshield, but with all the senses—curve by curve, fjord by fjord, light mood by light mood.

FROM BERGEN TO KALVÅG

SETTING OFF INTO THE VASTNESS OF THE FJORDS

A day full of contrasts. Between mountain passes and fjords, walls of snow and sandy beaches, the route takes us from the ancient Hanseatic city of Bergen across the Vikafjellet and to the windswept coast of Kalvåg. This stage of the journey showcases the quintessence of Norway in all its multi-faceted variety—raw, tranquil, and breathtakingly beautiful.
